

The **B-imune Kiddies Multivitamin** is a range of nutrients with added **probiotics** for digestive health and is specially designed and flavored for Kiddies.

By supplementing your child's diet everyday with **B-imune Kiddies**, you will knowingly supplement your child's needs for daily probiotics as well as the recommended daily allowance of **vitamins** and **minerals**. This should in return boost your child's immunity response against the daily attacks of viruses and bugs.

Vitamin C – Capsules (60's)

- ➔ With Probiotics
- Each Capsule contains:
 - ▶ Ascorbic acid
 - ▶ Probiotic bacteria

The **B-imune Vitamin C** is unique in that it is the only Ascorbic Acid on the market with added Probiotics.

Vitamin C is a water-soluble, antioxidant vitamin. It is important in forming collagen, a protein that gives structure to skin, bones, cartilage, muscle, and blood vessels.

Vitamin C promotes healthy teeth and gums, helps in the absorption of iron, aids in the maintenance of normal connective tissue, and promotes wound healing. It also helps the body's immune system.

Probiotics are the 'friendly' bacteria that inhabit your digestive tract and stimulate your immune system.

Hoodia – 60 capsules

- ➔ Each Capsule contains:
 - ▶ Hoodia gordonii

Hoodia gordonii grows naturally in the Kalahari Desert of Southern Africa. For hundreds of years the Bushmen people living in the Kalahari made use of the **Hoodia gordonii** plant to suppress their appetite while out hunting for food in the veld for days. Clinical studies have proven what the Bushmen knew for years and today **Hoodia** is widely used.

Nutritional supplement should not replace a balanced diet.

CalMag-D3 – Capsules (90's)

- ➔ With Probiotics
- Each Capsule contains:
 - ▶ Calcium
 - ▶ Magnesium
 - ▶ Vitamin D3
 - ▶ Probiotic bacteria

The **B-imune CalMagD3** is a Calcium, Magnesium and Vitamin D3 supplement, now with added Probiotics.

Calcium: Calcium is a mineral that plays an important role in the development and maintenance of the bones, is needed in tooth formation and is important in other body functions. The absorption of calcium is influenced by such factors as the amount of vitamin D in the body and the level of calcium already present in the bloodstream. Calcium in the bloodstream plays an important role in blood clotting, transmission of nerve impulses, muscle contraction, and other metabolic activities.

Magnesium: Magnesium is needed for more than 300 biochemical reactions in the body. It helps maintain normal muscle and nerve function, keeps heart rhythm steady, supports a healthy immune system, and keeps bones strong. Magnesium also helps regulate blood sugar levels, promotes normal blood pressure, and is known to be involved in energy metabolism and protein synthesis.

Vitamin D3: The major biologic function of vitamin D is to maintain normal blood levels of calcium and phosphorus. Vitamin D aids in the absorption of calcium, helping to form and maintain strong bones. Without vitamin D, bones can become thin, brittle and soft.

Omega-3 and 6 – 60 Softgels

- ➔ Each Capsule contains:
 - ▶ Omega-3 and 6
 - ▶ Essential fatty acids

EFA's are essential for proper health, but cannot be synthesized by the body, therefore they must be supplied by the diet. Essential **fatty acids** help with the formation of healthy cell membranes, the proper development and functioning of the brain and nervous system. These chemicals regulate numerous body functions including lowering blood pressure, cholesterol levels, immune and inflammatory responses.

Energy Drink – 30 x 40g sachets

- ➔ With Probiotics and Prebiotics
- Each sachet contains:
 - ▶ Vitamins and Minerals
 - ▶ L-Glutamine
 - ▶ L-Carnatine

B-imune is a nutritious food supplement that comes in the form of an easily digested energy drink. **B-imune energy drink** contains natural immune enhancing and supporting **micro-organisms (Probiotics)**, that together with other nutraceuticals, stimulate and repair the gastrointestinal tract, the largest immune organ in the body. **B-imune energy drink** therefore simultaneously provides nutrition whilst directly addressing the immune system via natural immune enhancing and supporting organisms and substances. **B-imune energy drink** is defined as a 'functional food', - a food that has health promoting capabilities beyond its nutritional value. Anyone who realises the importance of a healthy immune system, from those who simply want to enhance what they know is not a balanced diet to those who are suffering from chronic disease and want to experience an improved quality of life.

Immuno-meal – Porridge

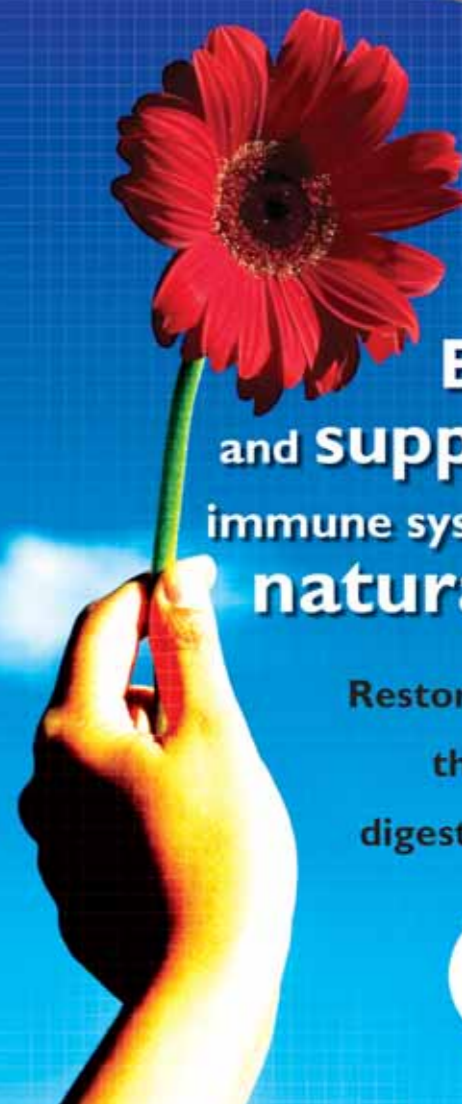

- ➔ With Prebiotics
- Each serving contains:
 - ▶ Vitamins and Minerals
 - ▶ pre-cooked maize and soy combination

Immuno-meal is a nutritious and filling porridge to be enjoyed by people of all ages. **Immuno-meal** is specifically enriched with a combination of **vitamins, minerals, prebiotics**. It contains soya which include **Omega-3** and **Omega-6** and isoflavones. Immuno-meal will boost your immune system to fight-off opportunistic diseases and aid in recovery from illness. Non-GM, lactose free, cholesterol free and preservative free.

Probiotic enriched supplements

Enhance and support your immune system the natural way

Restore & maintain the balance for digestive wellbeing

CENTRAL TO THE **B-IMUNE PHILOSOPHY** IS **PROBIOTICS**; AND THE IMPORTANCE OF THESE NATURAL BACTERIA TO THE WELL-BEING OF THE HUMAN DIGESTIVE AND IMMUNE SYSTEM.

PROBIOTICS – PROBIOTICS ARE THE “GOOD”, BACTERIA THAT ENHANCE AND RESTORE THE NATURAL INTESTINAL FLORA. THEY ARE IMPORTANT FOR PROPER DIGESTIVE FUNCTION, PARTICULARLY IN THE INTESTINE AS MOST NUTRIENTS ARE ABSORBED IN THIS AREA. WITH APPROXIMATELY 80% OF THE IMMUNE-PRODUCING CELLS RESIDING AROUND THE INTESTINAL TRACT, PROBIOTICS SERVE TO STIMULATE THE IMMUNE RESPONSE AND AID IN NUTRIENT ABSORPTION AND VITAMIN SYNTHESIS.

Probiotics – Capsules (60's)

- ➔ Each Capsule contains 1 Billion viable cells of:
- ▶ *Bifidobacterium longum*
 - ▶ *Bifidobacterium bifidum*
 - ▶ *Lactobacillus acidophilus*

The **B-immune Probiotics** are ‘friendly’ bacteria that support your digestive system. When ingested in sufficient amounts, probiotics contribute to overall wellbeing and help to prevent illness and fight disease. Millions of antibiotics are prescribed in South Africa every year and most people are unaware that these treatments upset the natural balance of friendly bacteria in our digestive tract. Other causes for the lack of friendly bacteria are high-pressure lifestyles, stress, rushed meals and a low-fibre diet. Common bowel problems, such as diarrhoea or inflammatory bowel disease (IBD) put strain on our immune system by destroying friendly bacteria. People who had a recent course of chemotherapy, recurrent Candida or yeast infections and are suffering from lactose intolerance, will benefit from **B-immune Probiotics**.

Prebiotics – Capsules (60's)

- ➔ With Probiotics
Each Capsule contains:
- ▶ Fructo – Oligosaccharides
 - ▶ Probiotic bacteria

The **B-immune Prebiotics** also referred to as ‘colon food’, are of the Fructo Oligosaccharides (FOS) type and serve both as a source of food for the Probiotics in the colon as well as a source of dietary fibre. Probiotics play an important role in increasing the Probiotic load, whilst also aiding in the improved adsorption of Calcium, Magnesium and Iron. Most importantly, Prebiotics indirectly enhance the body’s immune system and wellbeing by stimulating the growth of our “friendly” bacteria.

Family Multivitamin – Chewable Tablets (60's)

- ➔ With Probiotics
Each tablet contains:
- ▶ Vitamins & Minerals
 - ▶ Prebiotics (food for Probiotics)
 - ▶ Live Probiotic bacteria
 - ▶ L-Glutamine, L-Carnitine,

B-IMUNE Family Chewable Tablets, is the convenient and comprehensive solution to naturally enhancing and maintaining effective digestive and immune functions. **Probiotics** are the ‘good’ bacteria that enhance and restore the natural intestinal flora. They are important for proper digestive function. With approximately 80% of the immune-producing cells residing around the intestinal tract, Probiotics serve to stimulate the immune response and aid in nutrient absorption and vitamin synthesis. **Prebiotics** also referred to as ‘colon food’, are of the Fructo Oligosaccharides (FOS) type and serve both as a source of food for the Probiotics in the colon as well as a source of dietary fibre. **B-immune Family chewable** contains various antioxidants, including Vitamin A, Vitamin C, Vitamin E and Selenium. These antioxidants play a protective roll by neutralising free radicals before they can cause damage. **L-Carnitine** increases fat metabolism through the increased ability to transport fatty acids into the mitochondria for oxidation. Consequently, energy levels are increased. **L-Glutamine** decreases intestinal permeability, thereby improving gut barrier function, and enhancing immune activity within the gut. **Sportsmen and woman can maximise their performance by taking this probiotic supplement.**

Senior Multivitamin – Capsules (60's)

- ➔ With Probiotics
Each Capsule contains:
- ▶ Vitamins & Minerals
 - ▶ Probiotic bacteria
 - ▶ Coenzyme Q10
 - ▶ Lecithin
 - ▶ Ginko biloba

The **B-immune Senior Multivitamin** is a range of nutrients with a billion live Probiotics cultures per daily dosage, designed for the special needs of senior adults. This Multivitamin contains added **Lecithin** which helps to prevent and treat Atherosclerosis. It also helps to prevent and treat age-associated memory impairment. **B-immune Senior** contains **Ginko biloba** which will alleviate ageing related hearing loss, improves memory and concentration ability. **B-immune Senior** also contains **Coenzyme Q10** which has the potential as a Life Extension agent by retarding the death of cells in the Aging Process and Coenzyme Q10 will function as an Antioxidant

Teen Multivitamin – Capsules (60's)

- ➔ With Probiotics
Each Capsule contains:
- ▶ Vitamins & Minerals
 - ▶ Probiotic bacteria
 - ▶ B-Complex vitamins

The **B-immune Teens Multivitamin** is a range of nutrients with added Probiotics for digestive health and is specially designed for teenagers. **B-Complex vitamins**, which will increase alertness and concentration ability for the demanding schedules of today’s teenagers.

Pregnant Women Multivitamin – Capsules (60's)

- ➔ With Probiotics
Each Capsule contains:
- ▶ Vitamins & Minerals
 - ▶ Folic acid, iron and Omega 3
 - ▶ Probiotic bacteria

The **B-immune Pregnant Women Multivitamin** is a range of nutrients women and developing babies need, including Probiotics (1 billion viable cells), Folic Acid, Omega 3, Iron and Phyto Nutrients often inadequate in pregnant and nursing mothers.

Omega N-3 Essential Fatty Acids: When sufficient omega-3's are obtained from diet, it helps maintain good health, promote brain and vision development of the unborn and protect against disease. Omega-3 supplementation during pregnancy improves the intelligence, learning ability, memory and sight of the unborn.

Folic Acid: Folic Acid lowers the risk of neural tube birth defects during pregnancy.

Iron: is a mineral that supplies your cells with oxygen for growth and energy. Iron also makes red blood cells, and helps to build strong bones and teeth. The pregnant body must also make extra blood for the growing baby and it is especially important for pregnant women to increase their intake of iron-rich foods and take an iron supplement.

Probiotics are the ‘friendly’ bacteria that inhabit your digestive tract and stimulate your immune system.

Family Multivitamin – Capsules (60's)

- ➔ With Probiotics
Each Capsule contains:
- ▶ Vitamins & Minerals
 - ▶ Live Probiotic bacteria
 - ▶ Antioxidants

The **B-immune Family Multivitamin** and mineral supplement is the ideal product for family members to supplement their daily intake with a range of vitamins and minerals. By taking this supplement, we enhance the absorption surface of our digestive system, due to its probiotic content. This again results in an increased amount of nutrients and minerals in our diet. Probiotics also produce vitamins, absorb toxins, break down fibre and provide food for our cells. **B-immune Family capsules** contain various **antioxidants**, including Vitamin A, Vitamin C, Vitamin E and Selenium. These antioxidants are used to neutralize free radicals before they can cause damage.

Kiddies Multivitamin – 60 chewables tablets

- ➔ With Probiotics
Each Capsule contains:
- ▶ Vitamins & Minerals
 - ▶ Live Probiotic bacteria
 - ▶ Antioxidants
